EDUCATION

Texas Tech University

Master of Science in Software & Security Engineering

Bachelor of Science in Computer Engineering, Minor in Computer Science

- GPA: 3.75

Lubbock, TX

Spring 2028

Spring 2027

EXPERIENCE

T²WISTOR Laboratory, Texas Tech University

Undergraduate Researcher, Cyber-Aerial Computing

- Researched autonomous drone systems and cyber-aerial computing using Crazyflie platforms.
- Programmed and tested autonomous flight behaviors for embedded aerial computing research.

Lubbock, TX

Aug. 2026 - Present

DataAnnotation

AI Trainer, Programming – Independent Contractor

- Analyzed AI-generated code for correctness, efficiency, robustness, and adherence to requirements.
- Developed and tested reference solutions, bug fixes, and code examples across programming tasks.

Remote

Jul. 2026 - Present

Woody's Pizza & Bar

Full-Stack Software Engineer & Team Lead – Intern

- Led development of a full-stack customer rewards and SMS messaging platform for restaurant operations.
- Engineered a REST API, SQL database, and web application for customer and messaging workflows.
- Built and deployed a Raspberry Pi kiosk integrated with Azure cloud services for in-store use.

Lubbock, TX

Jan. 2026 - Aug. 2026

VervidAI

Full-Stack Software Engineer – Contractor

- Refactored and stabilized a full-stack web application, resolving defects across frontend and backend.
- Delivered new features and targeted fixes that improved overall application reliability and usability.

Lubbock, TX

Feb. 2026 - Apr. 2026

PROJECTS

Docme

Open-Source C++ Documentation Generator

- Developing a C++23 documentation generator for parsing source comments into structured documentation.
- Designed a modular plugin architecture and CMake build system for extensible parsing and output.

github.com/HonestBlake/Docme

Languages: C++

Simple CLI

Open-Source C++ CLI Parsing Library

- Built a lightweight C++23 CLI parser supporting typed flags, options, commands, aliases, and positionals.
- Designed a type-safe API with custom conversion, structured error handling, and CMake integration.

github.com/HonestBlake/Simple-CLI

Languages: C++

Pure Log

Open-Source C++ Logging Library

- Built a lightweight C++23 logging library with customizable levels, formatting, colors, and outputs.
- Designed a flexible logging API supporting custom loggers, output streams, and runtime configuration.

github.com/HonestBlake/Pure-Log

Languages: C++

SKILLS

Programming Languages

C/C++, Python, Java, C#, JavaScript/TypeScript, SQL, Verilog, Assembly, HTML/CSS

Development Platforms

Linux, Docker, STM32, MSP430, Arduino, Raspberry Pi, Azure, AWS

Frameworks & Tools

React, Vue.js, Electron, Node.js, .NET, Git/GitHub, CMake/Make, VS Code, Vivado, MySQL, LTspice, KiCad
