EDUCATION

Texas Tech University

Master of Science in Software & Security Engineering

Bachelor of Science in Computer Engineering, Minor in Computer Science

- GPA: 3.75

Lubbock, TX

Expected: Spring 2028

Expected: Spring 2027

EXPERIENCE

T²WISTOR Laboratory, Texas Tech University

Undergraduate Researcher

- Bullet 1
- Bullet 2

Lubbock, TX

Aug. 2026 - Present

DataAnnotation

AI Trainer, Programming – Independent Contractor

- Evaluate AI-generated code and provide feedback on correctness, efficiency, and clarity.
- Write and test software solutions, including corrections, examples, and reference implementations.

Remote

Jul. 2026 - Present

Woody's Pizza & Bar

Full-Stack Software Engineer & Team Lead – Intern

- Designed and deployed a full-stack customer rewards and messaging system for a local restaurant.
- Built a REST API, SQL database, and web application for customer management and SMS messaging.
- Developed a Raspberry Pi-powered kiosk with Azure cloud integration for in-store use.

Lubbock, TX

Jan. 2026 - Aug. 2026

VervidAi

Full-Stack Software Engineer – Contractor

- Refactored and stabilized a buggy full-stack web application into a polished, functional website.
- Resolved defects and implemented features, improving reliability and user experience.

Lubbock, TX

Feb. 2026 - Apr. 2026

PROJECTS

Simple CLI

Open-Source C++ CLI Parsing Library

- Created a lightweight, customizable C++ library for handling command-line flags, options, and arguments using modern, type-safe APIs.

github.com/HonestBlake/Simple-CLI

Languages: C++, CMake

Combat Robot

IR Controlled Combat Robot Using MSP430

- Designed and built a rover and remote controller within a set budget, capable of competing against other bots.
- Collaborated on hardware and software integration with a team, presenting weekly progress to peers.

Robotics Project Lab

Languages: C++, CMake

SKILLS

Programming Languages

Advanced C/C++, Java, C#, Python, SQL, JavaScript/TypeScript, HTML/CSS, Assembly, Verilog

Frameworks & Development Tools

Git/Github, VSCode, MySQL, React, .NET, Node.js, Make/CMak, Azure, AWS

Engineering Tools & Software

Arduino Uno, MSP430, Raspberry Pi, LT Spice, KiCad, Solidworks, Fusion 360

Core Competencies

Software Development, System Design, Circuit Design, Technical Presentation, Teamwork & Leadership
